Voices of American Women's History from Reconstruction to the Present

Contemporary Accounts of Daily Life

Edited by Kristine Ashton Gunnell, University of California, Los Angeles, USA and Claremont Graduate University, USA

Gender alone has never defined women's experiences in America. In this volume, Kristine Ashton Gunnell shows that, in addition to gender, identity markers such as race, class, religion, citizenship, and sexuality have historically directed the course of women's lives in the United States for more than 200 years. Women from diverse backgrounds are represented in media and documents that include pamphlets, book excerpts, personal narratives, photographs, advertisements, congressional testimonies, and Supreme Court rulings. Such issues as abortion, marriage equality, domestic violence, and gender parity are shown from historical and contemporary angles, as this collection of primary sources allows readers and students to easily trace how women's lives and histories have and continue to intersect. With a historical context for each selection, the book also features structured activities to help teachers with class discussion and exams, including suggestions for further reading, document analysis, essay questions, and manageable research assignments.

American Slavery on Film

Caron Knauer, *LaGuardia Community College, USA*

Caron Knauer analyzes how African American slavery has been and continues to be portrayed in major studio blockbusters and independent films alike. In her analysis of such films as the early silent film *Uncle Tom's Cabin* (1914), the groundbreaking television miniseries *Roots* (1977), and the Harriet Tubman biopic *Harriet* (2019), Knauer separates the romanticized and unrealistic depictions of slavery from the more accurate but often unflinching portrayals of its horrors.

The History of Ukraine

Paul Kubicek, *Oakland University, USA*

The Russia-Ukraine war that began in 2022 turned the world's attention on Ukraine, the second-largest country in Europe and one of the leading global exporters of wheat and other valuable commodities. Though some Russian leaders have long denied and continue to reject Ukrainian sovereignty, this book presents a comprehensive picture of Ukraine that is both intertwined with and distinct from Russian history. From its days as Kyivan Rus and its inclusion in the Russian Empire, to the Euromaidan demonstrations and the outbreak of war with Russia, Ukraine, as this book demonstrates, has developed its own identity, territory, and culture.

Encyclopedia of the Black Death

Joseph P. Byrne

This encyclopedia provides 300 interdisciplinary, cross-referenced entries that document the effect of the plague on Western society across the four centuries of the second plague pandemic, balancing medical history and technical matters with historical, cultural, social, and political factors.

Encyclopedia of the Black Death is the first A–Z encyclopedia to cover the second plague pandemic, balancing medical history and technical matters with historical, cultural, social, and political factors and effects in Europe and the Islamic world from 1347–1770. It also bookends the period with entries on Biblical plagues and the Plague of Justinian, as well as modern-era material regarding related topics, such as the work of Robert Koch and Louis Pasteur, the Third Plague Pandemic of the mid-1800s, and plague in the United States.

Unlike previous encyclopedic works about this subject that deal broadly with infectious disease and its social or historical contexts, including the author's own, this interdisciplinary work synthesizes much of the research on the plague and related medical history published in the last decade in accessible, compellingly written entries. Controversial subject areas such as whether 'plague' was bubonic plague and the geographic source of plague are treated in a balanced and unbiased manner.

Early Modern Europe

Facts and Fictions

Brian Jeffrey Maxson, *East Tennessee State University, USA*

Many myths about early modern Europe originated in the 19th and 20th centuries and continue to appear today across popular media. In recent years, such popular documentaries and television shows as *Game of Thrones* have tended to reinforce what we think we know about the world during the early modern period.

This work uses primary sources to interrogate popular beliefs about early modern Europe and reveal the true story behind such movements and events as the Scientific Revolution, the Crusades, and the European witch hunts. Focusing on how perceptions of these events have shifted and evolved through history.

Beasts and Monsters

Margo DeMello, Carroll College, USA

Comprehensive in its scope, this book is a valuable resource for anyone who wants to know more about creatures of myth and legend. Rather than purport to prove or deny the existence of these creatures, however, this volume classifies them within their respective cultural, historical, and social contexts, allowing readers to appreciate cryptids as cultural artifacts important to societies around the globe. Finally, this book goes beyond the study of the unknown to investigate who believes in cryptids, why they do, and why the study of cryptozoology is as much about understanding cryptids as it is about understanding ourselves.

Religion in the Classroom

Exploring the Issues

Jonathan M. Golden, Drew University, USA & Joseph J. McCallister, Drew University, USA

The framers of the American Constitution, in drafting the so-called 'Establishment Clause' of the First Amendment—Congress shall not establish nor prohibit the practice of religion—intentionally juxtaposed two seemingly contrasting articles, understanding that we would grapple with these questions anew each day.

This book treats the Constitution, and the First Amendment in particular, as a living document, one that requires interpretation and re-interpretation on a regular basis as our nation and its people evolve. The work discusses the background of the contemporary debate over religion in schools and covers contemporary concerns and provides objective, fundamental information about events, legislation, people, and other topics.
