Know It All! Beginner Guides to the Big World

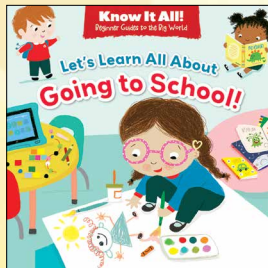

Some tasks—like going to school for the first time, learning about science, or helping to save the planet—may seem daunting and scary at first. Doing something unknown can be a challenge, but these guides focus on breaking down important topics into basics that early learners can comprehend and explore for themselves. The gentle tone invites readers to approach new experiences from a place of informed empowerment. With relatable illustrations, helpful sidebars and fact boxes, fun activities, and quizzes to test readers' knowledge, these volumes help curious readers better understand the world around them.

- Activities and quizzes throughout allow readers to apply the things they've learned
- Graphic organizers provide an additional way for readers to obtain information
- Charming, relatable illustrations allow readers to visualize themselves confidently dealing with the tasks described

Laugh-Out-Loud Jokes

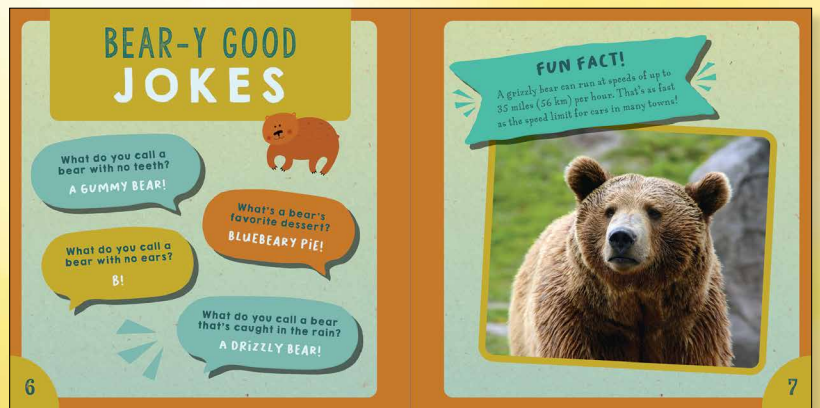

Reading is fun—and it can be funny too! Readers discover this as they explore a variety of silly jokes about popular topics that range from animals and food to monsters and outer space. The achievable language allows for the development of strong independent reading skills as kids learn new jokes to make their friends laugh out loud. In addition, a glossary helps readers build a strong vocabulary and enhance their understanding of each topic. The short, simple text and colorful design make this an engaging reading experience for reluctant and struggling readers, helping them discover the joy of reading.

- Fact boxes provide fun pieces of information related to the topics of the jokes to make each volume informative as well as entertaining
- The high-interest topics are meant to engage readers with a variety of interests and to present them with a fun way to view common curriculum topics such as history, space science, and holidays
- Resources for further information are included to help readers continue learning and develop independent researching skills

Space School

Space school is where young readers go to learn about what's beyond Earth's atmosphere. Unique, focused, and engaging lessons take them to other planets, to the moon, into orbit around Earth, and even to other galaxies! Topics are presented through fun activities that help readers better understand important concepts such as gravity. Each task is then connected to space science using informative text and helpful images, including diagrams. The age-appropriate tone, vibrant design, and hands-on approach create a learning experience that's a blast for future astronauts!

- Charming illustrations engage reluctant and struggling readers with bright colors and details that expand on what's presented in the text
- Short, focused text and eye-catching fact boxes allow for independent reading
- Activities give readers a fresh perspective on high-interest topics that are essential parts of elementary science curricula

Little Scientists, Big Questions

Little scientists often ask very big questions! In this case, the big questions are all about what certain people do at their jobs—all of which require some knowledge or application of STEM subjects. From a dentist's understanding of biology to the technology used by a crane operator, young readers discover the different ways people use science, technology, engineering, and math at work. This important introduction to science careers is presented in a captivating way, with achievable text and a colorful design featuring little illustrated scientists that guide readers through the answers to some big questions.

- The charming mix of illustrations and full-color photographs helps make these topics accessible for early learners
- Short, simple sentences allow for independent learning
- The fun, engaging tone inspires a sense of curiosity and a love for science at an early age

I'm Glad There Are...

Sometimes it's the little things in life that are taken for granted, like bugs or stars or trees! These volumes focus on appreciating many wonderful things in the natural world—no matter how big or small they are. From clouds and rain to oceans and seas, the volumes present charming illustrations with achievable text about the various reasons readers are thankful for the things they see every day in nature, in the sky, and around them. Fun facts about each topic invite readers to learn about the things in their lives they might notice, but not yet know much about.

- Sidebars and infographics fully immerse readers in each book's topic
- Activities invite readers to explore the world around them
- Concluding glossaries and indices allow readers to practice obtaining information from features beyond the main text

Fun Science Experiments

Science is all around us. It's in the art we create, the food we eat, the music we play, and the plants we grow! In these volumes, readers experience science firsthand as they are shown how to create fun and exciting experiments. As they follow detailed instructions to make art projects, try new recipes, create instruments, and explore the beauty of gardening, readers are sure to be as excited by their creations as they are amazed by the science behind them. Accessible text is paired with fun illustrations for an understandable and memorable hands-on experience.

- Six fun and intriguing projects are included in each volume
- Side-by-side illustrations guide readers to understand the tasks at hand
- Sidebars and safety tips ensure the projects are as enjoyable as they are safe
