Ask an Animal!

Kids ask lots of questions! What would it be like if an animal was there to answer some of their biggest questions about the natural world? Readers see for themselves in these helpful introductions to habitats. Many familiar science topics are covered—from biomes to adaptations—but with a fun twist! A cute cartoon animal guides readers through their habitat, answering common questions and sharing fun facts along the way. A polar bear guides them through the Arctic, a frog takes them on a tour of a pond, and a toucan gives them a bird’s-eye view of the rainforest!

- The delightful design combines adorable illustrations and full-color photographs
- The interactive question-and-answer format keeps readers engaged and allows them to independently evaluate how much they’ve learned at the end of each volume
- The creative approach to life science is meant to instill a sense of curiosity in readers about the world around them and to teach them that it’s good to ask questions

Accidental Genius: Science Puzzles for Clever Kids

The science behind storms and fun facts about mountain peaks and ocean depths are just some of the engaging elementary curriculum topics covered in these interactive guides to earth and weather science. Important information is paired with fun activities to complement what readers are taught in the classroom. From simple experiments and crafts to word puzzles, mazes, and more, readers explore science in a creative way. This unique presentation invites readers to stay curious about the world around them as they sharpen their cognitive skills and have fun along the way!

- Colorful illustrations and infographics anchor a delightful design that aims to appeal to reluctant readers
- A quiz is included in each volume to help readers strengthen their memory and reading comprehension skills
- A detailed answer key allows readers to check their work and independently assess their progress as they complete each activity and quiz

What Is Weather?

Why do we wear a T-shirt some days, but need a warm coat on other days? Because of the changing weather. Weather is the way the air around us feels. It is how hot, cold, cloudy, snowy, rainy, or windy it is each day.

The Main Weather Elements

Wind

The powerful movement of air across Earth's surface.

Temperature

How warm or cold it is outside.

Precipitation

Rain, hail, sleet, and snow falling from the sky.

Atmospheric pressure

The weight of air above an area.

Humidity

The amount of dampness in the air.

Picture Match

Can you find the 4 pictures showing precipitation?

Snowy

Rainy

Stormy

Cloudy

Steering

Shower

Sunny

Accidental Genius: Science Puzzles for Clever Kids

- A quiz is included to help readers develop comprehension and memory skills
- Answer keys allow readers to independently check their work and track their progress
- A wide variety of activities and puzzles—including word games, crafts, mazes, and more—are included to appeal to readers with varying interests and strengths

The Antarctic

The Antarctic is home to the South Pole. Unlike the Arctic, the Antarctic has rocky land underneath its thick layer of ice.

Antarctic Circle

Antarctic

Antarctic Circle

ANTARCTIC

There are no polar bears in the Antarctic. However, there are lots of seals and penguins!

Penguins

Penguins are the only birds that swim but can't fly!

Their body shape helps them glide through water.

A thick layer of fat helps keep them warm.

Their webbed feet help them swim.

Their feathers keep them dry and trap warm air.

Penguins waddle on their short legs.

They can slide along the ice on their bellies.

They use their sharp wings like paddles.
